[Document Body](#)

We heard last week that Assistant Secretary Woodley is contemplating rescinding/withdrawing/staying the Santa Cruz River TNW determinations made by the LA District for the Santa Cruz County and Pima

County stretches of the river for further HQ evaluation. Virginia Albrecht (representing Farm Bureau) went to Woodley on these calls, and may also be working with Pima County. One of the issues she allegedly raised is that the flows in question are effluent-dominated. This obviously has implications for other TNW calls (already made or in the works) in our region. The District has so far issued a final JD, fining sig nex for the tributary (La Canada?) to the TNW portion of the SCR, for a Pima County project, and has many in the works based on similar analyses. If the SCR TNW calls are no longer in effect, the LA District will have to redo the JD determinations for a number of Pima County projects.
